Protection Solutions for a Safer World

Roll-Up Shades and Door Shields

- Doors, hallway barriers, and larger windows deploy like a conventional motorized window shade from above the frame
- For smaller windows and doors, the hem bar locks into mounts that sit below the window to secure the shade in place
- Motor controls will function with a standard wall switch, wireless remote control, or by connecting to an existing alarm system

Roll-Ups mount above the frame

Raised

Locked into mounts

Direct Mount Door Shields

- Mount directly to the doors, staying fixed in place all the time
 - Installs in minutes
- Variations exist for all knob, lever, or push bar closures
- Protective covers allow window inserts to remain functional but completely obscured and protected in an emergency

Mounts into door slab

Accommodates all door types

Funding and Grant Assistance

- **Dept. of Justice COPS:** <https://cops.usdoj.gov/>
- **FEMA NSGP:** <https://www.fema.gov/grants/preparedness/nonprofit-security>

All applicants must for 501(c)(3)

Application process to start in March 2024, due by late spring

For the following programs, eligibility depends on state guidelines for use. Search the program term plus your state name for more details.

- **GEER**
- **ESSER** (public schools)
- **EANS** (non-public schools)
