

## What is nanoShield?

### nanoShield

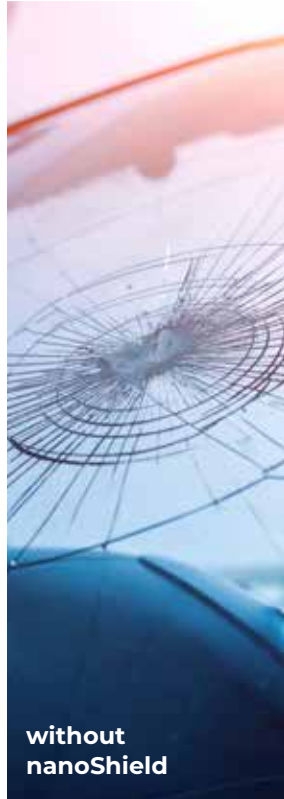

is a patent-protected, multi-purpose glass strengthener and water repellent solution that is designed to significantly increase windshield strength and decrease chipping and cracking due to impact from road debris and pressure caused by body flexing against the edges of the glass.

### nanoShield

is a "Smart Solution"

Once applied, nanoShield penetrates the glass surface, identifying and repairing the inherent microscopic flaws and defects that are a natural part of every piece of glass by covalently bonding with those surface imperfections.

Left untreated, those inherent defects weaken the glass structure and ultimately result in the failure (cracking or breaking) of the glass.

## STOPS

breaks, chips and cracks  
**BEFORE THEY HAPPEN.**

DECREASES REPAIR  
& REPLACEMENT  
COSTS

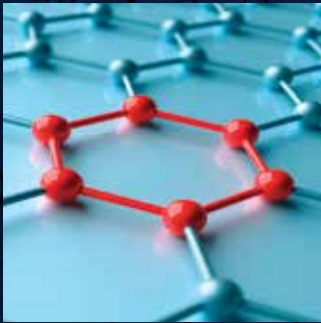

IMPACT  
RESISTANT

IMPROVES  
VISIBILITY

NON-TOXIC

**nanoShield**  
is NOT a window film.

It is a liquid chemical solution that once applied, cures to an invisible finish to help protect a windshield from chips and cracks.

It does not alter the look, clarity, reflectivity, or light transmission of the windshield.

In addition, it has a hydrophobic (water repellent) quality that helps water to bead up and run-off to improve driver visibility in wet weather conditions.

Save money with  
**nanoShield...**

by avoiding the need to repair or replace your windshield again and again.

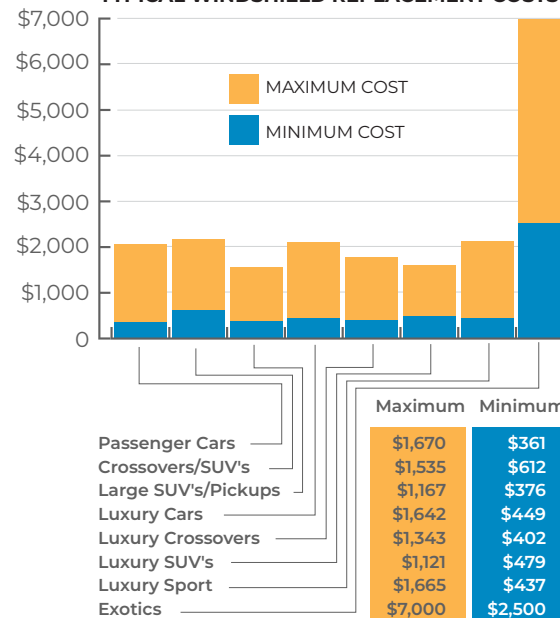

**nanoShield** decreases windshield repair and replacement costs up to...

**83%**

Earth friendly  
**nanoShield**

Our formula has been specifically engineered at Rice University to be environmentally friendly while also reducing the amount of discarded windshields entering landfills.

**TYPICAL WINDSHIELD REPLACEMENT COSTS**

**WORRY-FREE** with a  
**1-YEAR WARRANTY**

We're so confident, our warranty covers both repair and replacement when you use a Professional Installer.

See Terms & Conditions or ask your Installer for coverage details.
